For Immediate Release

Announcing Campus Exchange Network - A Student Powered Online Network to Exchange Books, Notes, Test Papers and More.

Rapidsoft Systems, Inc. today announced the launch of Campus Exchange Network an online platform for students to exchange used books, class notes, test papers and many more items of daily use. The system is free to use for students and will allow them to save money on textbooks.

Princeton, NJ, Sept 07, 2011

Just in time for the College season, Rapidsoft Systems announces the launch of Campus Exchange Network (www.campusxchangenetwork.com) an online platform for students to exchange used textbooks, class notes, test papers and other items that students want to pass on. The rising cost of text books is a major concern for all students and their parents. This platform allows students to obtain books from other users in their university and departments. No hassles of shipping or renting a book - just take the book from your seniors who took the same course before you. If you are lucky, you can get a book that you need even for free!

CampusXchange Network is a public website with the purpose of connecting textbook buyers and sellers so that they may purchase or sell their books in person or through the mail. The intended audience is individual college students, though anyone may use the site to buy and/or sell used or new textbooks. The other exchange features are being released shortly. With those features students will be able share their study material to get extra help to enhance their understanding of the subject.

CampusXchange Network is unique among other textbook sales websites in that it provides a way for users to find other students within their own school, program of study, and/or geographic area. This allows users the option to complete transactions in person and avoid the hassles and fees involved in shipping and online payment methods. It allows sellers to leave a book available for sale indefinitely (as opposed to a fixed-length auction site). Sellers may also set a desired price and accept or reject offers.

The rising cost of higher education means higher financial burden on everyone. Paying for a higher education these days is not easy. In addition to paying today's steep tuition prices, students are required to invest in prescribed text books. At the end of the term, once they're done with those books, they're of no use to them anymore. That was until now. Instead of making that money sit on the bookshelves, they could now sell those textbooks to their friends that will take the same course in the next term. It will get them extra cash that they can use to buy other text books for their new courses. This is a win-win situation for everyone. The CampusXchange aims to reduce the cost to successfully complete their studies.

Commenting on the development, Mr. Gurbinder Mavi, VP of Sales and Marketing for Rapidsoft Systems said, "We believe that *CampusXchange* meets a well defined need for students

in today's campus. Both parents and students are looking ways to reduce the burden of textbooks costs. The deployment of CampusXchange platform is our effort to help to meet these objectives in this difficult economic times. I am confident that parents will be happy to see that their children can now buy the books locally and save money. " .

The campusXchange platform can be accessed at http://www.campusxchangenetwork.com.
