

For Immediate Release

Rapidsoft Systems Updates Field Force Tracker, a major mobile enabled software for field service dispatch management

Rapidsoft Systems, a leading developer of Mobile Software and Other Solutions announced update of Field Force Tracker, a service dispatch software.

With Field Force Tracker™, the companies can service schedule and route quickly, dispatch sooner, collect accurate information immediately in the field and invoice faster. Our field service software makes it easy for you to eliminate waste, get more done in less time and be more profitable.

Field Force Tracker's Web-based Field Service Management Software will streamline Scheduling, Dispatch, Customer Management, Vendor and Employee Management, Work Orders, Equipment Maintenance, Inventory Tracking, Contracts, Estimates, Invoices, Payments and Accounting entirely online.

This Smart and Intelligent Job Scheduling software is designed to optimize resource usage and reduce cost. It considers job types, technician's skill types, their current locations, branches, departments and product types and many other important factors in considerations. It automatically filters the candidate technicians best suited for a job. All you need is to select one from possible multiple candidates. It can even auto assign proper technicians in a rule based scheduling for very large organizations or very large work force.

This software is designed to ensure that your field service teams - either your employees or your partners' - are utilized efficiently; minimizing long drive times and white space in their schedules. But just any technician won't do. To schedule and dispatch the right technician, you need to quickly work through complex matrices of availability, eligibility, service level agreements, parts and skill inventories. Only then can you efficiently manage work orders, maximize utilization rates, and keep your most valuable customers happy.

Field employees can use our feature rich yet simple to use Mobile Apps to update job location, generate invoices or submit timesheets saving time and money for you!
