Rapidsoft Systems Announces a New facility for Testing Mobile Applications Software

Rapidsoft Systems announces establishment of a new exclusive test facility to test mobile applications software. This will enable Rapidsoft Systems to test its client's applications locally on the US operators' networks using the latest generation of handsets.

Princeton, NJ, November 27, 2008 --To meet the growing need of mobile application software development and testing, Rapidsoft Systems has announced establishment of a new exclusive test facility in New Jersey to test mobile applications software. This will enable Rapidsoft to test its client's mobile applications locally on the US operators' networks using the latest generation of GSM and CDMA handsets.

"Rapidsoft systems has been lately working on a number of mobile applications and testing these applications on the US carrier networks required us to have our own dedicated test facility. Porting applications to work on US carrier's network is special challenge due to special certifications and verifications requirements in the USA. New handsets are being introduced every day, so we needed to be on top of these rapid changes. This will enable us to cut the development time drastically." Said Mr. Gurbinder Mavi, VP of Sales and Marketing for Rapidsoft Systems.

Rapidsoft Systems, a major custom software development company caters to all major mobile platforms for custom mobile application development maintains its own Mobile Device Porting and Migration center in India. "The experience has shown us that each carrier's network has some peculiarities with regards to mobile security certificates and handsets that are being offered. Hence, it was a natural step for us to serve our local customers better.", said Mr. Mavi. Looking into the rapid market demand for mobile applications, Rapidsoft's executive team believe that they can lower development costs and produce more reliable applications for its growing list of customer for its mobile software development services division.

Rapidsoft Systems caters to all major mobile platforms for custom application development, migration and device porting services. Rapidsoft's management team has been at forefront of cellular and networking technologies industry in the US and Canada. "Our team has built Cellular Base Stations, Cellular Switching Systems, Network Routers, Voice over IP solutions, Optical Networking Systems and Software, and even designed entire Handsets for the last 20 years. So, our expertise in building cellular and networking applications is unmatched and unique in the outsourcing industry. In terms of knowledge base, we are top of the pyramid as other outsourcing vendors from outside USA have very limited experience in this area", said Dr. Kumar, the CEO of Rapidsoft Systems, and veteran of Cellular and Networking Industry.

RapidSoft Systems, provides cost efficient porting solutions for all major platforms. Rapidsoft team ports for all platforms - be it J2ME or Symbian or BREW or Windows Mobile or BlackBerry or iPhone. Mobile Porting services offered by RapidSoft Systems can be divided into the following areas:

- Cross platform or Intra platform porting:
- J2ME to BREW, Symbian to BlackBerry, J2ME to iPhone etc.
- Operator or Carrier specific porting:
- Most US (AT&T (Formerly Cingular), T-Mobile, Sprint, Verizon), European (Vodaphone, Orange, Virgin Mobile etc.) and Canadian Carriers (Rogers, Telus etc.)
- Inter platform porting:
- Up-gradation of OS versions, new device compatibility, new features addition or enhancement, etc.

Rapidsoft has the experience of porting applications in more than 1500 handsets across the globe for diverse platforms and operators. Rapidsoft supports porting and testing, for the following mobile technologies:

- J2ME (CLDC 1.0/1.1, MIDP 2.0/1.0, Mobile Media API, Wireless Messaging API, Games API etc.)
- Symbian
- Brew/C++
- Blackberry SDK
- Flashlite
- Windows Mobile 5.0, 6.0
- Embedded Visual Studio (embedded Visual Basic/VC++)
- Microsoft .NET Compact Framework
- Metrowerks CodeWarrior
- iPhone SDK
- Custom SDKs

- Google Android/ LIMO (Linux Handsets)
