

Application Engineering and Redesign

In today's complex business environment, the management is under constant pressure to meet market challenges. Hence, there is a need to create applications to deliver faster time to market, achieve better response time for customer requests, expand to new market segments, and improve business process and operational efficiencies. IT organizations face increasing pressures to deliver more functionality, flexibility – and higher quality – at reduced costs.

Rapidsoft Systems' Application Reengineering Services

Advancing technology and dynamic business environment requires for the migration of legacy software systems to new and state-of-the-art technology environments to deal with the emerging business needs. At the same time, there is a need to preserve all the established business rules and practices. Rapidsoft Systems' application re-engineering services help your organizations to leverage benefits of latest technology platforms, frameworks, and software products to update IT systems and applications.

Rapidsoft Systems' re-engineering solutions provide strategies, methodologies, techniques, and tools that help clients re-engineer, rather than replace their existing legacy systems to keep pace with evolving business and technology requirements. We combine the knowledge of the client's business system processes with sophisticated reengineering tools to provide a highly flexible migration path to the IT solutions of the future.

Process of Application Reengineering Process

Rapidsoft Systems offers the following migration services:

- Language / Code Migration

- Operating System Migration
- Architecture Migration
- Data Migration
- Platform Migration
- Open Source Integration/ Migration

Rapidsoft Systems has expertise and resources to redesign enterprise-wide applications. We have been involved in designing and reengineering and integrating legacy applications written for mainframes with the latest web-based and client-server applications. In the process we have won kudos for delivering exceptional results for completeness, accuracy, and speed of migration.

Our Applications Reengineering services

Analysis and Assessment of Reengineering Options

Design and reengineering your legacy application using latest program, data conversion tools

Proven expertise in extracting business logic from legacy systems

Rapid transformation of your legacy application to contemporary platform

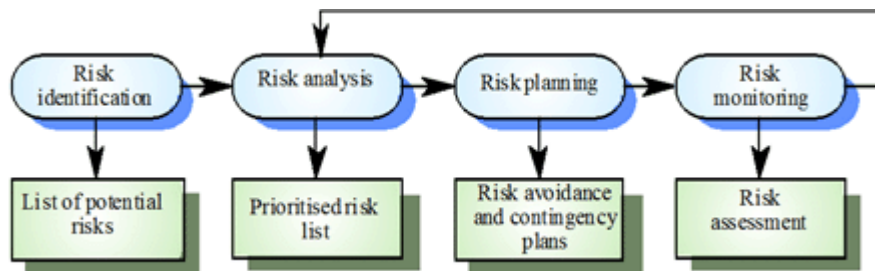

Enhancing value of your application

Expertise in contemporary technologies like Windows Server, Linux, .NET, J2EE, C/C++, C# etc.

Managing Reengineering Risks

Systematic Approach: Rapidsoft follows well developed processes. Our Project management team is trained to assess risk of reengineering tasks.

Cutting Edge Tools and Techniques: We use necessary tools and techniques to do data conversion, code conversion, logic conversion as applicable. This can cut down the reengineering cost substantially.

Process of a Risk Management

Benefits of Reengineering

After an application has been reengineered you can expect the following

- Scalability
- Higher Performance
- Maintainability of Software
- Lower Cost of Operation
- Operational Leadership

Business Benefits

Rapidsoft Systems' Application Software Engineering Team can help organizations realize their business objectives. Rapidsoft Systems' offerings have been instrumental for organizations to achieve operational excellence, reduce costs and provide customers with better products and services. Following are some of the key benefits that have been derived by our customers across the world:

- Reduce the time to develop and implement solutions
- Increase revenue through rapid go-to-market offerings
- Retain customers by more effective process management
- Improve market share by launching innovative products and services
- Increase agility to meet the dynamic business needs
- Utilize existing systems and people in a cost-effective manner

- Reduce operational costs by automating manual/semi-manual processes
- Improve cash flow by better operational management and integrated business processes

Why Rapidsoft Systems:

With over 350+ software projects executed, you can simply count on our expertise, experience in giving you the right solution at absolutely lowest possible cost. If you would like more information, or want us to submit an estimate or a "no-obligation" quote for your project, contact us for more information.
