Information Security and Compliance

Securing its business information is critical for every organization. We almost on daily basis hear or read about high profile attacks on corporate and government web sites. Bank computers are broken every year and important account data and credit card data is stolen by criminals. Besides having business and financial impact resulting from these attacks - there are legal issues resulting from these attacks. You need a well qualified team of security professionals to safeguard your network, your data and your equipment. This is what we at Rapidsoft can do for you. At Rapidsoft Systems, we specialize in four main practice areas: Assessment, Managed Security, Remediation, and Response in order to appropriately secure your organization's most critical information.

Overview of Information Security and Compliance Services

1. Security Assessment Services

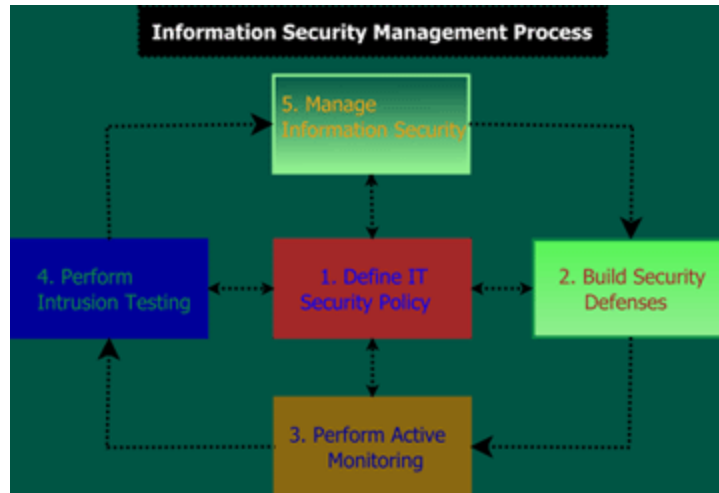

Security Assessment services assess your infrastructure and process security against existing industry standards using advanced technological tools and our knowledge of how hackers and insiders attack. Our security assessment services include:

- **Network Penetration Testing**
- **Web Application/Services Assessments**
- **Vulnerability Assessment**
- **Wireless Network and Mobile Device Connectivity Assessment**
- **Security Source Code Verification**

2. Managed Security Services

Our Managed security services are designed to supplement your internal security. These allow your organization to reduce its security burden while improving its level of protection from hackers and other threats. In order to detect attacks and prevent breaches, our managed security specialists remotely configure, monitor, and assess your systems, including:

- **Workstations and Servers**
- **Firewalls and Routers**
- **Email and DNS Server**
- **Access Control Systems**
- **Intrusion Detection Systems Set ups**
- **Web Applications**

3. Correction and Remediation Services

If our assessment team finds security vulnerability in your system and processes - we will offer remediation services. This team will focus on fixing issues identified during assessments and also covers the implementation of security solutions. Before putting a plan in place - our security expert will give you plan and go over various options, and explain you your systems' weak points. Each of the following remediation services offers a complementary way of securing your network:

- **Vulnerability Remediation**
- **IT Security Policy Development**
- **Security Perimeter Design and Implementation**
- **Secure Data Handling Process Development**

4. Incidence Response and Forensic

Our Incidence Response and Forensic services are designed to help you recover from an incident quickly while preserving the evidence for any future criminal action against internal or external hackers. They have been designed to effectively resolve security incidents by keeping project costs low and limiting overall exposure. The specific service offerings are as follows:

- **Incident Response**
- **Forensics and Attack Analysis**
- **E-discover Support**
- **Incident Response Handling Process Development**

Why Rapidsoft Systems:

With over 350+ software projects executed, you can simply count on our expertise, experience in giving you the right solution at absolutely lowest possible cost. If you would like more information, or want us to submit an estimate or a "no-obligation" quote for your project, contact us for more information.
