

Network Technology Solutions

Rapidsoft Systems has a legacy of network technology expertise - a company started by world's leading network technology specialists. We didn't acquire this expertise just in the universities- but in addition by building complex networking products, writing standards documents and leading world class research in the areas. We have led research and innovations in the networking field for years. As matter of fact, our chief executive still reviews academic research papers for prestigious journals and conferences in the networking field to stay updated. Technology is a true passion for us not just a job. And, we built some of the largest switching and routing products, and also deployed numerous networks.

Overview of IP Networking Related Services

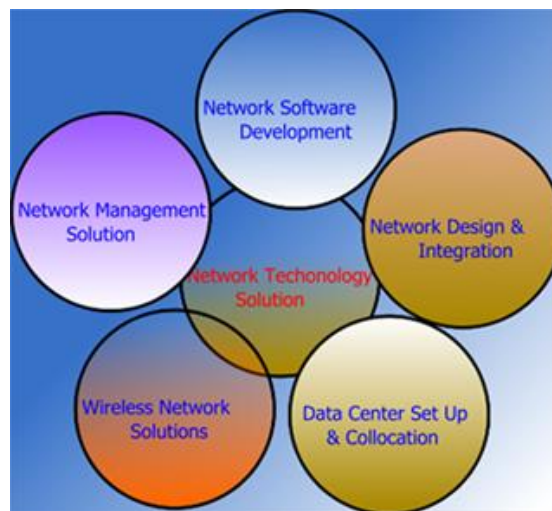

Our key Networking Services are:

Network Design and Deployment

Rapidsoft Systems offers design and implementation services for your network Infrastructure no matter what the size. **Whether you need a new network or if you are updating an existing network, we can provide a design and implementation solution for you. We are experienced in Cisco, Juniper, Barracuda, Windows Server, Linux, Net Screen, Nortel, Alcatel and Linux Network Server technologies. Our engineers are skilled in Network Security, VoIP, Active Directory, Wireless Access Point installations, Layer 2 and Layer 3 VPN set ups. See our Network design services for more details.**

Network Software Development

Rapidsoft Systems has extensive expertise in the implementation and design of Network technology products. We specially can write software of technology products. We have worked on designing routers, switches, base station code, cable modem code and all other software systems. We can do custom hardware and embedded system design, write device drivers and work with various real time operating Systems (RTOS). Our founders have been involved in the development technology products and key standards in such prestigious organizations such as IETF, IEEE, Open Mobile Alliance (OMA) and 3 GPP. **Check our Networking software design services for more details.**

Rapidsoft Systems' Network Technology Solutions

Network Management

Rapidsoft Systems provides in-house and remote Network Management based on our customers specific requirements needs. Our network engineers can remotely manage your any size network. Regardless of size of your network, we have a solution that is just right for you. We utilize industry leading network management and monitoring tools. Our services are designed to reduce cost of operations, increase customer service and provide a strategic approach to support that will drive the greatest Return on investment. We offer 24x7 coverage to all our customers. Since we don't sell hardware - we have no obligation to any one other than our customers. We are not here to push any specific hardware to you.

- **Network design and maintenance (including wireless)**
- **New technology integration and upgrading old technology**
- **Connectivity of new offices**
- **Secure remote access**
- **Security and performance monitoring**
- **24x7 coverage for network emergencies**
- **Coverage for absent System Administrators or technicians**

Wireless Networks Design and Implementation

Wi-Fi networking and mobile networking are revolutionizing businesses world wide. In today/s competitive environment, innovative services and applications are critical in helping companies maintain agility and differentiation.

Rapidsoft Systems offers a complete integrated wireless solution utilizing the best of technology options. We provide wired + wireless technology integration that it is backed by our years of experience in designing secure networks that can keep you safe from hackers and security breaches. Also see our security services.

Benefits of Rapidsoft's Wireless Services

- World class performance and coverage in a complete solution
- Highest possible security
- Easy to manage and use
- Cost effective deployment
- Scalability and flexibility

Data Center Set Up and Collocation Services

Rapidsoft Systems can organize collocation services for you in suitable facility meeting your particular requirements. It doesn't matter if your need is for 2 servers or 2000 servers - Rapidsoft Systems will be able to meet your needs and create solutions. Our engineers have experience in working with and supporting almost every major operating system, from Windows Server to Unix and Linux.

Why Rapidsoft Systems:

With over 350+ software projects executed, you can simply count on our expertise, experience in giving you the right solution at absolutely lowest possible cost. If you would like more information, or want us to submit an estimate or a "no-obligation" quote for your project, contact us for more information.
